AI-Powered Marketing Transformation
Portfolio

AI-enabled marketing operations, workflow automation and customer engagement systems

PORTFOLIO THEMES

- Conversational AI, voice AI and lead qualification workflows
- AI-assisted productivity automation across email, calendar and task routing
- Lead quality, routing and spam filtering improvements using n8n and AI logic
- Enterprise-ready prompt systems, APIs and low-code automation

20 YEARS	\$3M-\$4M+	400+	6,000+	15X ROMI

Executive Positioning

Portfolio Focus: AI-enabled marketing operations, workflow automation, customer engagement automation and productivity systems that improve marketing scalability and operational efficiency.

Business Relevance: Designed to support enterprise marketing, lead qualification, customer support, routing automation and AI-assisted operational intelligence.

Tech Stack: GPT, Claude, Dify, n8n, Retell AI, APIs and webhook-driven workflow orchestration.

AI Powered Website Chatbot for Lead Qualification & Customer Support

KEYWORDS: **Conversational AI** | **Lead capture** | **Customer support** | **RAG-style workflows**

CHALLENGE	Improve user engagement and handle first-level queries while capturing leads more intelligently on the website.
ACTIONS	Built a conversational AI chatbot using Dify, defined structured prompts for product queries, support and lead capture, and created guided conversation paths.
BUSINESS OUTCOMES	Improved lead qualification , support responsiveness and website engagement readiness.

AI Voice Agent for Automated Customer Interaction

KEYWORDS: **Voice AI** | **Inbound automation** | **Customer interaction** | **Scalability**

CHALLENGE	Handle inbound queries and simulate human-like conversations for repetitive customer interaction use cases.
ACTIONS	Built a voice agent using Retell capable of basic call scenarios and repeatable inbound interaction flows.
BUSINESS OUTCOMES	Reduced manual response effort and proved a scalable voice-AI engagement model.

Automated Spam Filtering for Website Leads

KEYWORDS: **Lead quality** | **Workflow automation** | **CRM hygiene** | **AI-assisted filtering**

CHALLENGE	Improve lead quality by detecting and filtering spam or low-intent form submissions before CRM entry.
ACTIONS	Built an n8n workflow that combines rule-based and AI-assisted logic routing to separate spam from genuine leads and append qualified data to Google Sheets.
BUSINESS OUTCOMES	Improved lead quality and created a cleaner intake process for sales-ready leads.

AI Personal Assistant for Email, Calendar & Task Automation

KEYWORDS: **Productivity automation** | **Email workflows** | **Calendar orchestration** | **Task routing**

CHALLENGE	Streamline daily productivity by automating email handling, meeting coordination and calendar management.
ACTIONS	Designed an n8n-based assistant to automate email sorting, scheduling, reminders and task routing between email and calendar actions.
BUSINESS OUTCOMES	Improved productivity by reducing repetitive coordination and manual task handling.

AI Capability Map

AI Marketing Operations | Conversational AI | Voice AI | Prompt Systems | Workflow Automation | Lead Qualification | Customer Support Automation | Productivity Systems

Technologies: GPT | Claude | Dify | n8n | Retell AI | APIs | Webhooks | Workflow orchestration

Use cases: lead qualification, customer support, conversational automation, productivity automation, spam filtering, and operational intelligence.
